

# CON\_IF\_Level1\_001

Write a program to accept an positive integer and print the name of the month and the number of days in that month?

## Input Format

First line has the number of test cases. Following lines have a single integer that needs to be processed.

## Constraints

$1 \leq n1 \leq 12$

## Output Format

Month name has N days

## Sample Input 0

```
3
12
2
10
```

## Sample Output 0

```
December has 31 days
February has 28 days
October has 31 days
```
