

OPE_REL_Level1_0017

Write a program to find the smallest of four numbers ?

Input Format

The first line informs you the number of test cases. Each separate line has four integer values to find the relation between the four integer values i.e. to find the largest of the four values

Constraints

$-2147483647 \leq n1, n2, n3, n4 \leq 2147483647$

Output Format

%d < %d < %d < %d

Sample Input 0

```
3
90 45 12 100
10 190 100 1234
1290 823 100 56
```

Sample Output 0

```
12 < 45 < 90 < 100
10 < 100 < 190 < 1234
56 < 100 < 823 < 1290
```
